

BiOCOVERS

Smart Landscaping Textiles

Biocovers is the first **100% biodegradable and compostable weed control mat**. Weeds don't stand a chance and the mat facilitates the growth of the newly installed plants and trees. By using Biocovers the use of synthetic mats or herbicides can be avoided.

ADVANTAGES

- Ecological weed control
- 100% made of plant material
- Easy to handle and transport
- No maintenance, no herbicides
- Compostable

In cooperation with:

BIOCOVERS: BIODEGRADABLE AND COMPOSTABLE

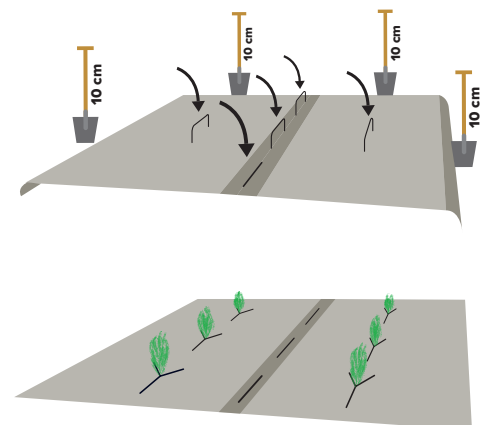

Biocovers is the first **100% biodegradable and compostable weed suppression fabric** which fully breaks down into nutritious matter leaving no synthetic residues.

WHY USING BIOCVERS?

- Biocovers is the ideal and sustainable solution for **landscaping and roadside planting**; after installation Biocovers requires **no maintenance**.
- Biocovers **stimulates the growth of plants** by its outstanding water and air permeability.
- UV stable: **no need to cover** with mulch or bark. Biocovers doesn't shrink when exposed to sunlight.
- **Prevents surface erosion**.
- Biocovers is **easy to transport, cut and install**.
- Biocovers is available in **different weights and dimensions**.

HOW TO INSTALL BIOCVERS?

1. Free the surface of weeds and flatten the underground.
2. • Fix the mat carefully with U-shaped pins.
• Dig the ends of the mat in the soil (minimum 10 cm deep).
3. Make Y-shape incisions for planting.
4. After planting, close the mat carefully and if necessary close the incision with a pin.
